

Commercial Sod Project Prep Checklist

Use this checklist to get your commercial sod project qualified faster and avoid back-and-forth delays.

Before requesting pricing or scheduling, make sure you've got the following information ready. It helps us move quickly, quote accurately, and ensure sod is prepped and cut fresh for your job.

1. Square Footage

Estimate the **total square footage** of sod needed.

If you're still finalizing site plans, send any blueprints or landscape takeoffs available.

2. Project Location

Include the **jobsite address**, city, or nearby landmark.

We use this to confirm delivery feasibility and estimate your timeline.

 *We regularly service Tulsa, Broken Arrow, Coweta, and surrounding areas.*

3. Delivery or Install Timeline

Let us know your **ideal delivery or install window**, even if it's flexible.

We'll align it with harvest and trucking schedules to keep things fresh and on time.

4. Point of Contact (Required)

Provide full contact details for the **on-site decision-maker or coordinator**:

- Full Name
- Email Address
- Phone Number
- Business/Company Name
- Business Billing Address

This contact should be available for scheduling updates, jobsite access, and invoice approval.

5. Payment Details

We require payment confirmation before delivery. Be ready with one of the following:

- ACH transfer (preferred for commercial projects)
- Company check (must be cleared before sod is cut)
- Credit or debit card (processing fees may apply)
- Prepaid invoice for net terms (available for repeat or approved customers)

Invoices are typically sent via email. Make sure your point of contact is authorized to approve or coordinate payment.

6. Project Type

Let us know what kind of site we're working with:

- Commercial or retail development
 - School, church, or public space
 - Athletic field
 - Housing subdivision
 - Municipal or government project
 - Industrial warehouse or distribution site
-

7. Sod Type

Most commercial jobs use **Bermudagrass** due to its sun tolerance, quick establishment, and cost efficiency.

Let us know if your spec sheet requires a different variety.

8. Add-On Services (Optional)

Do you also need:

- Basic grading
- Rock or debris clearing
- Topsoil delivered
- Mulch for trees or entrances?

Let us know what's already handled vs. what you'd like help coordinating.

How to Submit Project Details

Email your blueprints, site details, and point of contact info to:

 **ok.sodfarm@gmail.com**

Be sure to include:

- ✓ Jobsite address
 - ✓ Square footage
 - ✓ Desired sod type
 - ✓ Point of contact (with phone, email, and billing address)
 - ✓ Preferred delivery window
-
